Ioannis Panitsas

17 Hillhouse Avenue, New Haven, 06511, Connecticut, USA
• ioannis.panitsas@yale.edu

EDUCATION

Yale University, New Haven, Connecticut, United States of America 08/2022

- Ph.D Student in Electrical Engineering, School of Engineering and Applied Science
  - Concentration: Networking, Security, Artificial Intelligence
  - Advisor: Prof. Leandros Tassiulas

Yale University, New Haven, Connecticut, United States of America 08/2022 - 05/2023

- M.Sc. in Electrical Engineering, School of Engineering and Applied Science
  - Grade: Honors
  - Concentration: Networking and Security

School of Military Engineering, Loutraki, Greece 04/2021 - 08/2021

- Certificate in Military Engineering, Engineering Corps, Hellenic Army

University of Patras, Patras, Greece 09/2016 - 07/2021

- Integrated Master's in Electrical and Computer Engineering (5-year joint degree; 300 ECTS)
  - Grade: 8.40/10.0
  - Concentration: Wireless Networks, Security, Embedded Systems
  - Advisor: Prof. Dimitrios Serpanos

12th General Senior High School, Patras, Greece 08/2014 – 06/2016

- Grade: 20.0/20.0
- Concentration: Engineering and Applied Sciences

PROFESSIONAL & RESEARCH EXPERIENCE

Graduate Research Assistant, Yale Institute of Network Science, New Haven, United States of America

- Researcher in Wireless Networking and Computer Security

2nd Lieutenant, Engineering Corps, Hellenic Army 08/2021 - 05/2022

- Principal trainer of recruit soldiers (Basic Combat Training, Advanced Individual Training)

Undergraduate Research Assistant, University of Patras, Patras, Greece 10/2020 - 02/2021

- Implementation of a static – dynamic approach for machine-learning-based malware detection and classification

Embedded Software Engineer, Internship, Dialog Semiconductor, Patras, Greece 08/2020 - 10/2020

- Researcher in Quality Assurance Group
- Contributed to export vulnerabilities using the Protocol "Bluetooth Low Energy"

PUBLICATIONS

Yigit Y., **Panitsas I**., Maglaras L., Tassiulas L., & Canberk B., Cyber-Twin: Digital Twin-boosted Autonomous Attack Detection for Vehicular Ad-Hoc Networks. Paper submitted for review in ICC 2024.

Panitsas I., Mudvari A., & Tassiulas L., Leveraging Constraint-Aware Deep Reinforcement Learning for Adaptive Synchronization in Software-Defined-Networking. Paper to be submitted in ICDCS 2024.

COURCES

Selected Courses

Yale University

- S&DS 565: Introductory Machine Learning – Fall 2022
  Instructor: J. Lafferty
- S&DS 665: Intermediate Machine Learning – Fall 2023
  Instructor: J. Lafferty
- CPSC 963: Network Algorithms and Stochastic Optimization - Spring 2023
  Instructor: L. Tassiulas
- CPSC 567: Introduction to Cryptography – Spring 2023
  Instructor: C. Papamanthou
- CPSC 552: Deep Learning Theory and Applications – Spring 2023
  Instructor: S. Krishnaswamy
- CPSC 583: Deep Learning on Graph-Structured Data – Fall 2023
  Instructor: R. Ying
- CPSC 513: Computer System Security – Fall 2023
  Instructor: T. Barron

University of Patras

- ECE 807: Architecture of Network Systems – Spring 2020
  Instructor: D. Serpanos
- ECE 701: Computer Architecture – Fall 2019
  Instructor: D. Serpanos
- ECE 410: Computer Communication Networks – Fall 2018
  Instructor: M. Logothetis
- ECE 604: Communication Systems – Fall 2019
  Instructor: M. Logothetis
- ECE 703: Digital Communications I – Fall 2020
  Instructor: V. Stilianakis
- ECE 806: Digital Communications II – Spring 2020
  Instructor: V. Stilianakis
- ECE 805: Distributed Real Time Embedded Systems – Spring 2020
  Instructor: S. Koubias
- ECE 802: Wireless Networks and Mobile Communications – Spring 2020
  Instructor: S. Kotsopoulos
- ECE 702: Wireless Propagation – Fall 2020
  Instructor: S. Kotsopoulos
- ECE 704: Microcomputers and Microsystems – Fall 2019
  Instructor: S. Kalivas

SKILLS

- Programming Python, C, C++, OpenMP, SQL, MongoDB, HTML, CSS, JavaScript
- Tools Git, Docker, Wireshark, Cuckoo Sandbox, MobSF, OpenAirInterface, OpenRAN Studio

PROJECTS

Selected Projects

- Exploring and Benchmarking Quantum Convolutional Neural Network Architectures
- Graph Temporal Neural Networks for Link Prediction in Wireless Mesh Networks
- Deep Reinforcement Learning Approaches for SDN Synchronization
- Malware Analysis and Classification using Machine Learning
- Detecting Malicious Network Traffic using Machine Learning

SOCIETIES & AFFILIATIONS

- Member of Astronomy & Astrophysics group (University of Patras)
- Member of amateur football team

LANGUAGES

- **English** (fluent), **Greek** (native)
